Instructions for attaching the Retro-Fit Bib to your Mask

Step #1

There are 2 different sections of protective tape on your Retro-Bib that cover the adhesive used to attach your Retro-Bib to the bib of your current mask bib. First remove the larger section of protective tape from your Retro-Bib as depicted below. (You will not remove the smaller section until the entire front of the Retro-Bib is secured in place).

Front of Retro-Bib

Back of Retro-Bib

Remove Protective Tape

Step #2

With both the front of your mask and the front of your Retro-Bib facing you, slip the Retro-Bib over your mask bib, making sure that it is centered, and the larger portion of the Retro-Bib covers the front of the mask bib, while the smaller portion on the opposite side overlaps the back of your mask bib. Your mask bib should be sitting in the small pocket like shape of the retro bib.

Step #3

Once the mask bib is centered, make sure it's completely in the Retro-Bib "pocket" so that the Retro-Bib is as far over the mask bib as possible, and essentially acts as a "second skin" to your current mask bib. Press firmly down on the front of the mask bib to adhere the Retro-Bib to the front of your mask once you have made sure everything is in place.

Front of Retro-Bib Covering Mask

Back of Retro-Bib Covering Mask

Mask bib placed entirely into Retro-Bib before securing

Step #4

Now remove the smaller section of protective tape from the back of the Retro-Bib in the underside of your mask. Once you have made sure that this section is as form fitting to your mask bib as a "second skin" in the back, press firmly to adhere this section onto your bib.

Remove Tape

Secure to Inside of Bib

Entire Retro-Bib now Secure

Congratulations! You now have a foil mask with a conductive bib!

Please note: The Retro-Fit Bib is designed to fit Absolute Fencing brand masks *only*.
